

The life of an Intern in the Dinex Group

Daniel

Student: Global management and manufacturing, SDU
 Internship: Dinex Group
 Department: Supply chain

Standardizing master data

One of my primary tasks was to create standardization of the master-data in Dinex. This is a monumental task, so I scoped it to be something more tangible. The area of choice was intercompany account numbers. I established a project team with knowledge of how these changes would impact data and people across Dinex, and delegated tasks based on expertise.

BEFORE CHANGES															
DLV	DCN	DDK	DFI	DFR	DGE	DIN	DIT	DLV	DPL	DRU	DSP	DSR	DTR	DUK	DUS
	1006	399090 / 399091 / 399092	700685	1006	D09103 / 399090		1004		395010	8550	331001	8550	399090	1002	892056
NOW															
DLV	IDLV1	IDLV1 / IDLV2 / IDLV3	IDLV1	IDLV1	IDLV1 / IDLV2		IDLV1		IDLV1	IDLV1	IDLV1	IDLV1	IDLV1	IDLV1	IDLV1

The eventual output of the project was rules for account numbers which increased simplicity and visibility internally in Dinex.

Establishing a green-field facility in India

The greatest challenge and opportunity I was provided with, was going to India to a newly established Dinex facility. I went to implement good practices across the site, from the get-go. I became part of the management team, acting on equal terms with all managers.

This meant that I was actively a part of both future planning and daily operations, including presentations to key stakeholders, taking responsibility for planning production and calculating required equipment to reach future customer demand. This involved acquiring the appropriate tanks for creating different batches of washcoat and trolleys for moving components between in-process cells and warehouse.

Projects

Some of the key projects of my internship was to standardize processes while organizing master-data and to establish good practices from the get-go in a greenfield facility in India. The standardizing and organization project was primarily scoped to cover the intercompany account numbers for Dinex.

A welcoming workplace

The co-workers at all Dinex entities, are extremely open and welcoming. As many projects includes the international aspect, establishing contact with relevant co-workers from different sites is essential. The friendly and welcoming culture will help you reach the key stakeholders for your project.

Why choose Dinex?

Dinex is the type of workplace which provides all the possibilities you can hope to meet as a student assistant or an intern. All types of projects and tasks you will do at Dinex will have an international aspect and developing an understanding for different cultures happens easy and concurrently with your daily work. You will often be guided towards a project goal, but Dinex provides you with a lot of freedom in how you will reach this goal.

going the extra mile
