

A Clamp is NOT Just A Clamp!

going the extra mile

We integrate our expertise into every component of the exhaust system.

With our competence for design and production of high-quality clamps, we offer a wide range of clamps to fit and connect the most demanding exhaust installations for both modern on- and off-road vehicles.

Our Clamps are:

- Directly replaceable with OE
- Wide range of clamps for on- and off-road applications
- OE performance for aftermarket price
- Stock item for fast delivery

Advanced design technologies including:

- Slip-joint technology
- Low leakage clamps for latest emission standards
- Durable design assembled by optimized spot-welding mechanical joints

End user-oriented engineering process:

- Design for easy installation
- Thread lock to minimize loose clamps due to vibration

V-Clamps

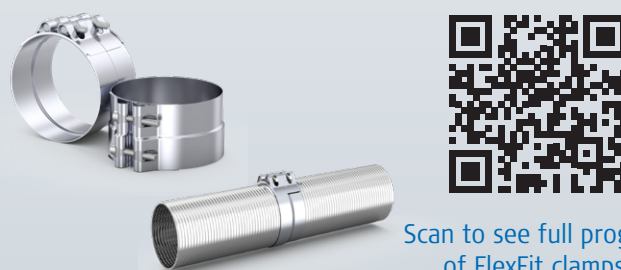

The most gas-tight clamp design supplemented with specifications from OE manufacturers.
