

Diesel Particulate Filters For Euro VI Trucks & Busses

NEW

Your Partner in Exhaust and Emission

Diesel Particulate Filters

Our DPF's are:

- Directly replaceable with OE products
- Tested at Dinex Test Center
- Made according to OE technology - Comparable PGM loading
- Higher soot load capacity, PGM and longer lifetime compared to regenerated DPF

HP-SiC. Dinex high porosity silicone carbide substrates developed for outstanding filtration efficiency, trapping even the smallest particles, superior soot loading capacity for longer journeys without the need to regenerate. Made in-house by staff with 30+ years of experience in emission field, using only the latest of technologies and equipment.

Cordierite. Today's leading technology in emission field. Offers serious performance for a lower, more affordable price while keeping tight focus on heat-up efficiency. All Dinex emission solutions are encased in high quality stainless steel mantles, coupled to the substrate via a vibration mat for top-notch holding force and impact protection.

Contact your local Dinex office or visit dinex.net for more information.
