- Buses and Coaches
- LCV's

going the extra mile

Low Emission Zone Map

The Dinex Group

Dinex Group is a leading global manufacturer and distributor of innovative engineered exhaust and emission control products and solutions for the heavy duty diesel engine and vehicle industry. The constantly growing portfolio of more than 15,000 part numbers and complete systems represents everything from pipes, silencers, clamps, flexible pipes, insulations and after treatment products like SCR's, DOC's and DPF's.

Dinex is the only manufacturer worldwide of exhaust and emission products that has its own technology and production platforms of emission substrates and coating facilities.

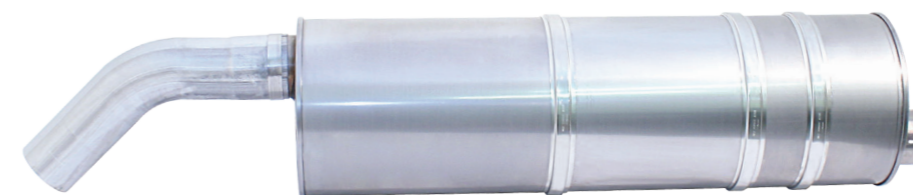

Dinex produces more than 95% of all material for its complete exhaust systems - from turbo to tailpipe - including advanced emission technologies.

Retrofitting with Dinex

Dinex Aftermarket Particulate filters give you:

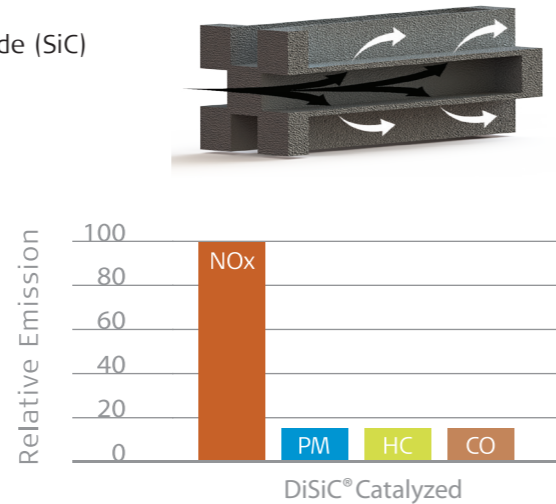

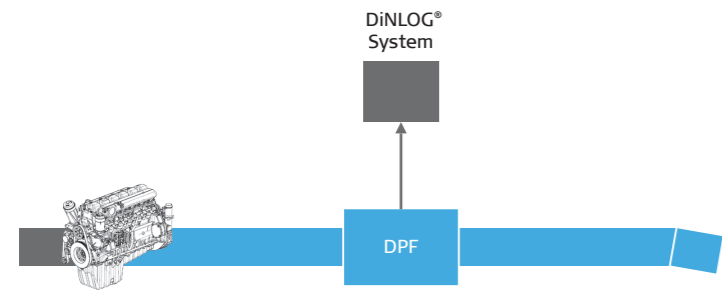

- Direct replacements of original silencers
- LEZ filter approvals in Europe
- Stainless steel material for extended lifetime
- Substrates are supplied as closed units for DPF and DOC functionality
- Reduces more than 95% of PM
- Wide range of products for all makes and models
- Wide range of universal filters suitable for Off-Road machinery
- More than 10 years of experience - Dinex has installed more than 30 000 DPF systems

Installation is simple and easy because our direct replacement solutions fit 1:1 to original silencers and no bracket or pipe adaption is necessary.

Multi-Technology

Dinex uses Silicon Carbide (SiC) filters in retrofit silencers. Silicon Carbide filters have an outstanding mechanical strength, thermal durability and it offers up to 5 times higher soot load capacity than Cordierite filters. SiC filters provides best functionality and lifetime of system. It reduces 95 - 99% of PM.
DiSiC® is registered trademark by Dinex A/S of a Silicon Carbide (SiC) Diesel Particulate Filter (DPF).

DOC's

For effective regeneration process for many applications Dinex offers solutions with combination of DOC and DPF. Metal core DOC removes carbonous oxides and hydrocarbons from the exhaust gas, rises the temperature of the exhaust gas and produces NO₂ for better DPF regeneration.

Dinex DiNLOG® System

A controlling unit monitors the back pressure level. If the particles (PM) have not been regenerated / burned away from the ceramic cells of the Dinex particulate filter unit, the back pressure rises and the DiNLOG® will give an alarm to the driver. Both, LED and advanced display version is available. DiNLOG® is your guarantee for a fully functioning and well maintained filter.

Integral Insualtion

Dinex integral insulation technique is widely used by vehicle manufacturers all over Europe, and recognized as an extremely durable and high performing heat insulation technique.
