

**Pumps & Injectors for AdBlue®**  
For direct replacement of OE parts

going the extra mile

Your Partner in Exhaust and Emission

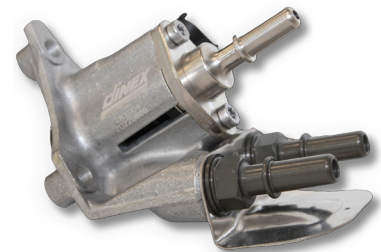

## We are proud to announce the extension of DinTronic range by adding injectors and pumps for AdBlue® as the next step to keep your ATS system healthy.

We have noticed that in many cases problems with the ATS system are caused by a faulty injection system for AdBlue®. This further leads to crystallization of AdBlue®, SCR blockage, NOx sensor failure etc. It is much more cost effective to maintain the injection system for AdBlue® and avoid expensive ATS system repairs.

## DinTronic, Injectors for AdBlue®

### Our Injectors for AdBlue® are:

- Directly replaceable with OE injectors
- Tested at Dinex test center
- Stock item for fast delivery
- A cost effective balance between emission control and Urea consumption
